

The AI-Fueled Analytics Platform

If data products are your day-to-day, you're probably looking for an analytics tool that can be easily integrated into your product and rolled out to your end users as quickly as possible. The tool should deliver trusted, actionable data insights to your customers and colleagues — offering a single source of truth — no matter whether they are data professionals, business stakeholders, or technical teams.

With GoodData Cloud you can:

Get up and running fast:

Most complex GoodData deployments take just **6 –12 weeks to implement.**

Rely on the Freshest Data:

Connect and query your data source directly without the need to copy or move data — use advanced caching to keep data warehouse costs low.

Automate Analytics with AI-Fueled Features:

Allow end users to seamlessly explore data using ML and AI-fueled UI. Data engineers benefit from AI-powered developer tools allowing them to define models and data science tasks in one platform.

Empower the end user:

AI-assisted, drag-and-drop UI can be easily integrated into your data product, allowing non-tech users to create and customize their own charts and dashboards, taking the load off your team.

Boost Efficiency With Automation and Analytics as Code:

Integrate easily with other tools thanks to our APIs, SDKs, and headless approach. Your analytics engineers will enjoy building with our code-based developer tools and blueprints — benefit from version control, effective collaboration, and automated deployment.

Embed into apps, web portals, and workflows:

Use either React SDK, Web Components, or iFrame, to seamlessly integrate your analytics into any environment.

Scale Analytics With Multitenancy:

Make analytics part of your existing data and application stack — distribute to all your teams, partners, or customers, while keeping their data separated and secure.

These are just some of the ways GoodData can help to solve your data challenges. To learn more, [request a demo today.](#)

About GoodData

GoodData is the leading cloud-based data and analytics platform, bringing AI-fueled data-driven decision-making to organizations across the globe. With a platform that leverages the potential of automation and AI, GoodData empowers its customers to make data analytics available to every single end user via real-time, self-service data insights right at the point of work. Over 140,000 of the world's top businesses and 3.2 million users rely on GoodData in order to drive meaningful change and achieve more through data.
