

The AI-Fueled Analytics Platform

As a Chief Data Officer, you know that today's BI isn't about fancier charts. Too often decision-makers are failing to access the data they need, with bottlenecks reducing efficiency and testing relationships. While many data tools are stagnant and built for another era, GoodData is a flexible platform ready for tomorrow's analytical needs. By bringing the philosophy of software engineering to analytics, GoodData swiftly delivers high-quality data to the people who need it most.

With GoodData Cloud you can:

Experience rapid ROI:

Most complex GoodData deployments take **just 6 –12 weeks to implement**. Customers report an average return of \$4 for every dollar invested in the platform.

Trust your data:

Extensive data governance with comprehensive testing, validation, and monitoring ensures trust in your data from source to dashboard. Version control paired with a robust semantic layer results in a single source of truth.

Empower your users:

Drag-and-drop UI enables non-tech users to create and customize charts and dashboards. AI-powered features like forecasting and NLQ mean faster decisions to drive LOB goals and leverage data monetization opportunities.

Unite your teams:

Leverage one central hub for your DevOps, DataOps, and BI teams. Users with all skill levels can collaborate with pro-code, low-code, or no-code UI in a single environment.

Scale your analytics:

Multi-tenant architecture allows you to easily accommodate increases in data volume, end users, and business partners (without spiraling costs).

Integrate with your existing stack:

The platform easily combines with other tools thanks to our APIs, SDKs, and headless approach — providing fast time to value.

The above are just some of the ways GoodData can revolutionize your data strategy, ensure data quality, and drive business value through analytics and governance. To learn more, [request a demo](#) today.

About GoodData

GoodData is the leading cloud-based data and analytics platform, bringing AI-fueled data-driven decision-making to organizations across the globe. With a platform that leverages the potential of automation and AI, GoodData empowers its customers to make data analytics available to every single end user via real-time, self-service data insights right at the point of work. Over 140,000 of the world's top businesses and 3.2 million users rely on GoodData in order to drive meaningful change and achieve more through data.
