

GoodData Cloud

Analytics for Every Use Case

What if you could empower all of your teams and customers with real-time business insights? With GoodData Cloud, you can bypass traditional software barriers, harnessing the power of automation and AI to rapidly integrate your analytics.

We empower data-driven decision-making

Rely On the Freshest, Fastest Data

Connect and query your data source directly without the need to copy or move data — use advanced caching for higher performance and lower data warehouse costs.

Integrate With Any Application Stack

Continue using your preferred data stack. Our APIs and SDKs will help you to achieve time-to-value fast — while keeping the developer experience in mind.

Enable AI-Fueled Data Discovery

Use our low-code/no-code UI to create interactive dashboards and charts. AI-powered features like NLQ, forecasting, and clustering enable faster insights and faster decisions.

Choose Your Preferred Deployment

Benefit from managed or self-hosted options — based on your regional requirements.

Embed Analytics Into Your Application

Integrate charts and dashboards into your data products with your preferred embedding method — iFrame, Web Components, or React SDK — or customize and white-label to match your brand.

Scale Analytics With Multitenant Architecture

Dynamically scale your analytics and accommodate increases in data volume and users — distribute personalized analytics instances to teams, partners, or customers via multitenancy.

Boost Efficiency With Code-Based Automation

Create analytics environments faster than ever before with our collaborative code-based developer tools and blueprints.

Ensure Trust in Your Data

Take advantage of security and governance features as well as a robust semantic layer for consistent, accurate, and secure data.

About GoodData

GoodData is the leading cloud-based data and analytics platform, bringing AI-fueled data-driven decision-making to organizations across the globe. With a platform that leverages the potential of automation and AI, GoodData empowers its customers to make data analytics available to every single end user via real-time, self-service data insights right at the point of work. Over 140,000 of the world’s top businesses and 3.2 million users rely on GoodData in order to drive meaningful change and achieve more through data.
