GoodData

GoodData
Composable Data & Analytics

What if you could empower your business and customers to lead with data, no matter where it lives - on premises, in the cloud, or anywhere in-between? When it comes to analytics at scale, and promoting a data-driven culture, there's no one more experienced than GoodData.

Our composable data and analytics platform enables organizations to face the challenge around scaling insights across their employees, customers, and partners. With over a decade of trust built into one of the largest install bases, GoodData will help you break data silos by ensuring a real-time, open, governed, and scalable platform.

How We Empower Data-Driven Decision Making:

Analytics at Scale

GoodData's platform helps bridge the gap between business and IT by scaling access to business insights for all users - whether they are employees, customers, or partners.

Composable Architecture

Leverage your existing data management and analytics applications as building blocks for adaptive and intelligent decision making, with low-code and no-code capabilities for developers.

Data Fabric

Deliver integrated and enriched data - at the right time, in the right shape, and to the right data consumer for supporting various data and analytics use cases of your organization.

API-first

Leverage any user interface of your choice, connect with any data source, with continuous integration and continuous deployment. GoodData's platform is architecture agnostic.

Semantic Layer

All of your end users, including self-service users, understand the data in the same way. The semantic model enables users to retriece consistent and valuable insights from their data, no matter their level of data literacy.

GoodData
Composable Data & Analytics Platform

Embed analytics into your applications
Launch embeddable dashboards, charts, and graphs in unmatched time to market.

Lower barriers to analytics adoption
With GoodData's self-service analytics, business managers and specialists can instantly build their own dashboards and visualizations to retrieve the insights they need.

Scale on demand with confidence
Dont pay per use when scaling your business. Plus, as your organization grows in data volume, so will your analytics - without impacting performance.

Count on your insights
GoodData lays the foundation for flexible data connection and transformation. Advanced data modeling and semantics ensure integrity and accuracy for every metric.

Deploy to your preferred cloud
Choose from any cloud - AWS, Azure, or GCP.

Protect your data
Our platform is secure at every level, from multitenant architecture to regulatory compliance.

GoodData is on a mission to break data silos by ensuring a real-time, open, governed, and scalable platform. Our leading composable data and analytics platform gives our customers the flexibility to build and scale any of their data use cases; from self-service and embeddable analytics, to machine learning and IoT — while maintaining the performance, cost-efficiency, and easy change management of such a central and integrated solution.
